PATENT

Atty. Docket No. 2658-0246P

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Keun No PARK Conf.: 9754
Appl. No.: 09/725,572 ✓ Group: 2812
Filed: November 30, 2000 Examiner: ROMAN, A.
For: METHOD OF PREVENTING GENERATION OF PARTICLES IN
CHAMBER

**COMMENTS ON EXAMINER'S STATEMENT
OF REASONS FOR ALLOWANCE**

MS IF

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DEC 11 2003

Sir:

The Notice of Allowability (PTOL-37) mailed October 22, 2003 included an Examiner's Statement of Reasons for Allowance. The Examiner states "the prior art of record either singularly or in combination failed to anticipate or render obvious the limitations of increasing the pressure within the chamber to greater than or equal to atmospheric pressure by injecting a nitrogen gas into the chamber and drawing out the surface treatment gas from the chamber while injecting the nitrogen gas, the surface treatment gas converting the substrate surface into an organic material as required by claim 1."

Applicant notes that the present application also includes independent claims 13 and 17. Claims 13 and 17 do not recite a "nitrogen gas." Rather, claims 13 and 17 recite a "moisture displacing gas."

Further, independent claim 17 does not recite that the surface treatment gas converts the substrate surface into an organic material.

CONCLUSION

Should there be any outstanding matters which need to be resolved in the present application, the Examiner is respectfully requested to contact Scott L. Lowe (Registration No. 41,458) at the telephone number of the undersigned below.

If necessary, the Commissioner is hereby authorized in this, concurrent, and further replies, to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17; particularly, extension of time fees.

Respectfully submitted,

BIRCH, STEWART, KOLASH & BIRCH, LLP
